

The diagram illustrates a cross-section of a road pavement structure. It features several layers and components labeled in Slovenian:

- 4 cm obrabna plast NOVO STANJE**: A new 4 cm wear layer, shown as a thin layer with vertical hatching on the left.
- diloplast namaz**: A bitumen mastic layer, shown as a thin layer with diagonal hatching on the right.
- 0.50**: A dimension line indicating a horizontal distance of 0.50 units between two vertical reference lines.
- 4 cm obrabna plast OBSTOJEČE STANJE**: An existing 4 cm wear layer, shown as a thin layer with vertical hatching on the right.
- nosilna plast OBSTOJEČE STANJE**: An existing base layer, shown as a layer with diagonal hatching on the right.
- tampon OBSTOJEČE STANJE**: An existing bedding layer, shown as a layer with a hexagonal pattern on the right.
- 10 cm nosilna plast NOVO STANJE**: A new 10 cm base layer, shown as a layer with vertical hatching on the left.
